Apertures in Aluminum, Steel, Stainless Steel, Wood and PVC both for domestic and commercial clients as well as Foreign Markets especially North Africa.	Companies in the same sector and others in complimenting sectors such as finishes, renewable energy and construction.
Andrew Vassallo	Our business started in 1986 in a small workshop in a residential garage in Qormi with the production of steel works, such as steel doors, security grills, trolleys etc. The market demand encouraged us to also include the production of aluminum works as well. Thus we had to change our premises to a larger workshop in same area, which consequently gave us the opportunity to increase our market and include also imported items to our vast range of manufactured steel and aluminum products. We commenced by introducing modular staircases to the Maltese market and also add street furniture and cast iron products.	Manufacturing of aluminum and steel works; construction and building materials	Companies operating in construction and building finishes
ARKEM Limited	Arken limited develops and converts properties for residential and commercial purposes.	Development and conversation of properties for resale and residential and commercial rental purposes.	Company would like to meet companies which provide services and materials for construction, finishes and furnishing.

EMDP	<p>EMDP is a professional consultancy firm instituted in 1995 and working in the design, environmental management and planning fields. Offering a plethora of consultancy services, the firm has successfully serviced leading Clients like the Government of Malta, the Malta Environment and Planning Authority, the University of Malta, Malta Industrial Parks, Transport Malta, various Local Councils, various high street banks, and other leading local and international businesses. EMDP Ltd. offers a myriad of services in the building development, design, engineering road construction, conservation, environment, planning, and project management scene. In order to successfully and efficiently provide all the services in the best possible manner, the company is organized into four distinct groups that cover these responsibilities. The firm's four units function independently of each other; while sharing common resources, management, administration, and back-up facilities. In accordance with current policy; the Senior Partner and the various project leaders co-ordinate, and supervise all work undertaken. The practice is also supported by a pool of consultants engaged on an ad hoc basis - these include personnel well-versed in their field of study, academically qualified to a first degree and/or post-grad level, and have worked in the Maltese, European & International scene. Ecologists, geologists, foresters, hydrologists, archaeologists, art historians, chemists, ecological divers, archaeological divers, all form part of this team.</p>	Architects / Engineers / Urban & Environmental Planners
